Professional Experience

Founder & Lead Developer — Happy Tweet | 2023 - Present

• Architected and launched a full social networking platform, overseeing end-to-end development using PHP, MySQL, and JavaScript.

• Engineered key features: secure authentication, real-time content feeds, and scalable media pipeline.

• Configured AWS Lightsail infrastructure, achieving 99.9% uptime with optimized Nginx and database performance.

• Enhanced application security and scalability by implementing proactive best practices and monitoring.

Web Developer & CSM — Sokal Limited | 2022 - 2023

• Led the development of high-traffic client websites with custom WordPress themes and plugins.

• Collaborated with cross-functional teams to align technical solutions with business and marketing objectives.

• Improved performance and SEO, reducing average page load time by 40% and boosting Core Web Vitals scores.

• Implemented advanced security hardening, ensuring robust protection against cyber threats.

• Delivered consistent client satisfaction by providing long-term technical consulting and support.

Key Projects

Happy Tweet - Social Networking Platform

Independently developed a feature-rich social media application to master full-stack web development, including server configuration and user experience optimization.

Tech Stack: PHP, MySQL, JavaScript, HTML/CSS, AWS, Nginx
